EXTRACTOR FAN CONTROL

The figure displays two Gantt charts illustrating task scheduling for five tasks: Lav, Risc, Scar, Asp, and Car. The tasks are represented by horizontal bars, and the charts show the timing of each task relative to a common timeline.

Top Chart (Baseline Schedule):

- Lav:** Starts at time 0, runs until time 1, then splits into two parallel segments from time 1 to time 2. A double arrow indicates a continuation or split.
- Risc:** Starts at time 0, runs until time 1, then splits into two parallel segments from time 1 to time 2.
- Scar:** Starts at time 0, runs until time 1, then splits into two parallel segments from time 1 to time 2.
- Asp:** Starts at time 0, runs until time 1, then splits into two parallel segments from time 1 to time 2.
- Car:** Starts at time 0, runs until time 1, then splits into two parallel segments from time 1 to time 2.

Bottom Chart (Modified Schedule):

- Lav:** Starts at time 0, runs until time 1, then splits into two parallel segments from time 1 to time 2. A double arrow indicates a continuation or split.
- Risc:** Starts at time 0, runs until time 1, then splits into two parallel segments from time 1 to time 2.
- Scar:** Starts at time 0, runs until time 1, then splits into two parallel segments from time 1 to time 2.
- Asp:** Starts at time 0, runs until time 1, then splits into two parallel segments from time 1 to time 2.
- Car:** Starts at time 0, runs until time 1, then splits into two parallel segments from time 1 to time 2.
